## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claim 78 is rejected under 35 U.S.C. 102(e) as being anticipated by Fukuyama (6,470,164). The process cartridge by Fukuyama teaches a developing device, a cleaning device, development device comprising an agitating section and a development section; and wherein the agitating device is positioned at a lower level than the developing section with the cleaning device overlying the agitating section (figure 1; column 3, lines 50-67).

2. Claim 83 is rejected under 35 U.S.C. 102(b) as being anticipated by Kurokawa et al (5,873,016). The process cartridge by Kurokawa et al. teaches a transfer body implemented as an inclined belt since it has inclined portions; plural developing devices; plural cleaning devices; and wherein at least part of one of said the developing devices is positioned above an adjacent cleaning device (figure 2; column 3, lines 50-67).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2852

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 80-81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukuyama in view of Endo et al (US2002/0009316). Fukuyama does not teach cleaning device having a cleaning blade and a fur brush.

Endo et al. teaches a cleaning device having a fur brush and a blade in figure 17. The fur brush comprises an electric filed source 135. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teaching Endo et al. with the image forming device of Fukuyama to surely cleaning the member to be cleaned.

***Allowable Subject Matter***

5. Claims 62-77 and 82 are allowed.

***Response to Arguments***

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Contact Information***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quana M. Grainger whose telephone number is 571-272-2135. The examiner can normally be reached on 8am-6pm.
